

■ DataScribe Analysis Report

Generated on: 2025-08-31 23:16:49

■ *Report Summary*

This report provides a comprehensive analysis of your dataset including data quality assessment, statistical summaries, and AI-powered insights.

■ Table of Contents

1. Dataset Overview
2. Data Quality Assessment
3. Statistical Summary
4. Column Analysis
5. Visualizations
6. AI Insights & Recommendations

■ Dataset Overview

Dataset Metric	Value	Description
Total Rows	891	Number of data records
Total Columns	12	Number of features/variables
Memory Usage	0.28 MB	Storage space required
Numerical Features	7	Continuous/numeric variables
Categorical Features	5	Text/category variables
Datetime Features	0	Date/time variables

■ Dataset Insights

- Compact dataset - consider data augmentation for complex models
- Balanced feature set for comprehensive analysis

■ Data Quality Assessment

Quality Metric	Value	Status
Overall Quality Score	83.8%	Excellent
Missing Values	866	■
Duplicate Rows	0	✓
Constant Columns	0	✓

■ Quality Insights

- Your dataset has excellent data quality!
- Consider handling 866 missing values

■ Statistical Summary

Column	Count	Mean	Std	Min	25%	50%	75%	Max
numerical	N/A	N/A	N/A	N/A	N/A	N/A	N/A	N/A
categorical	N/A	N/A	N/A	N/A	N/A	N/A	N/A	N/A

■ Summary Statistics

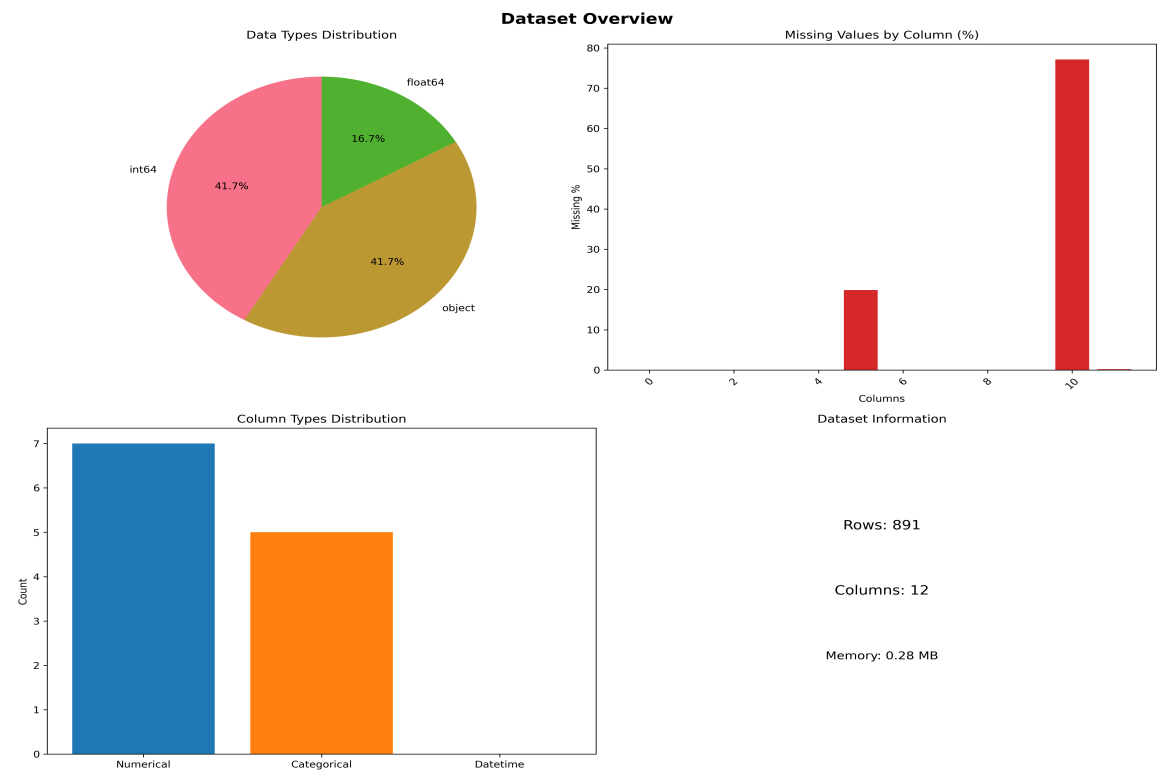

- Total numerical columns analyzed: 2
- Data points per column: N/A

Visualizations

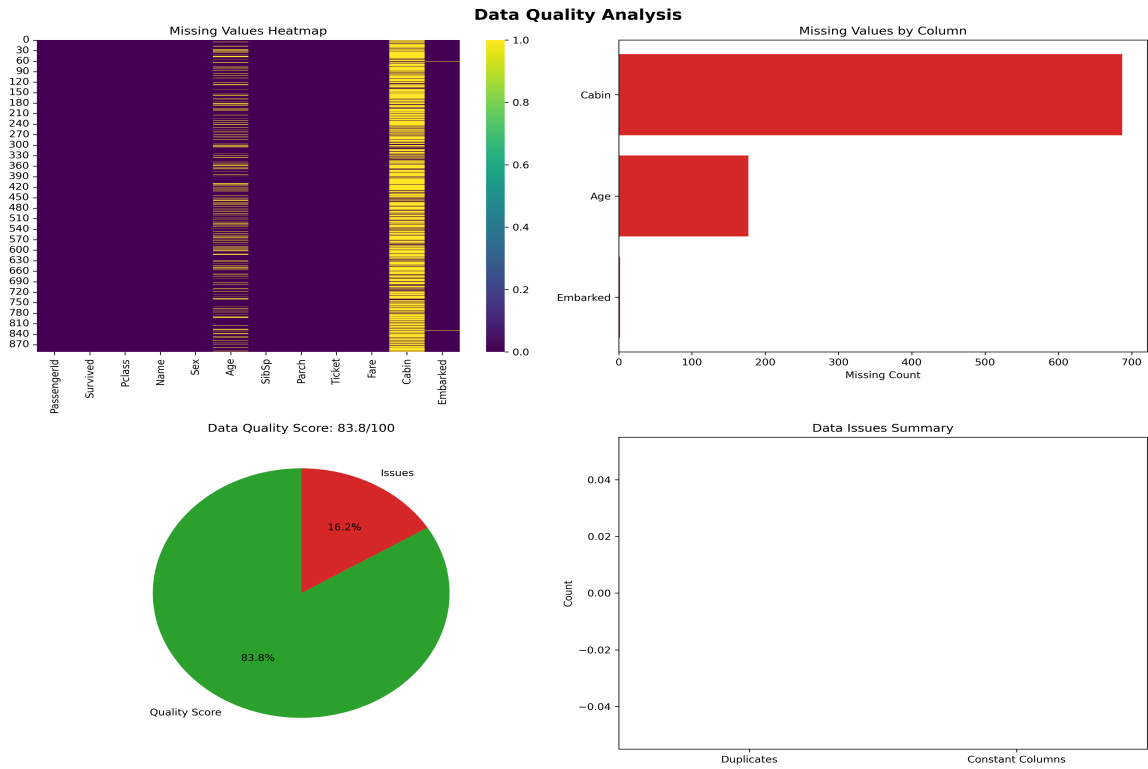

Generated Visualizations

- Overview, Data Quality, Univariate, Bivariate, Multivariate, Target Analysis

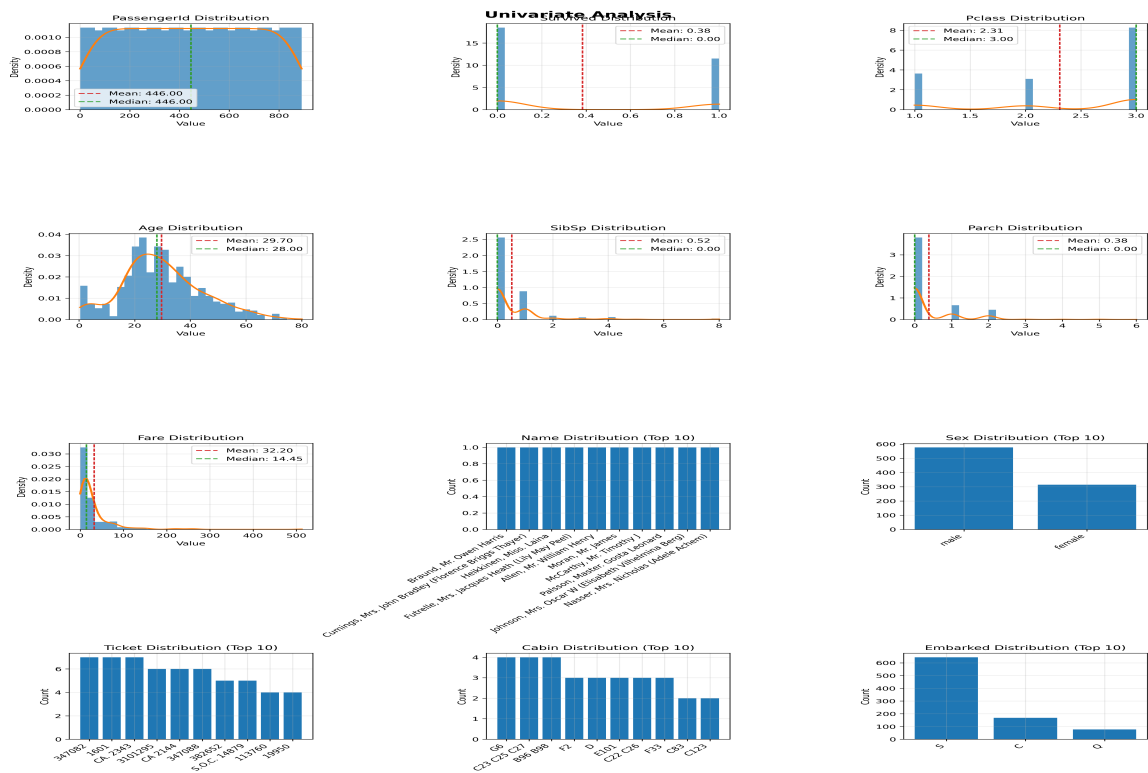

Overview

Data Quality

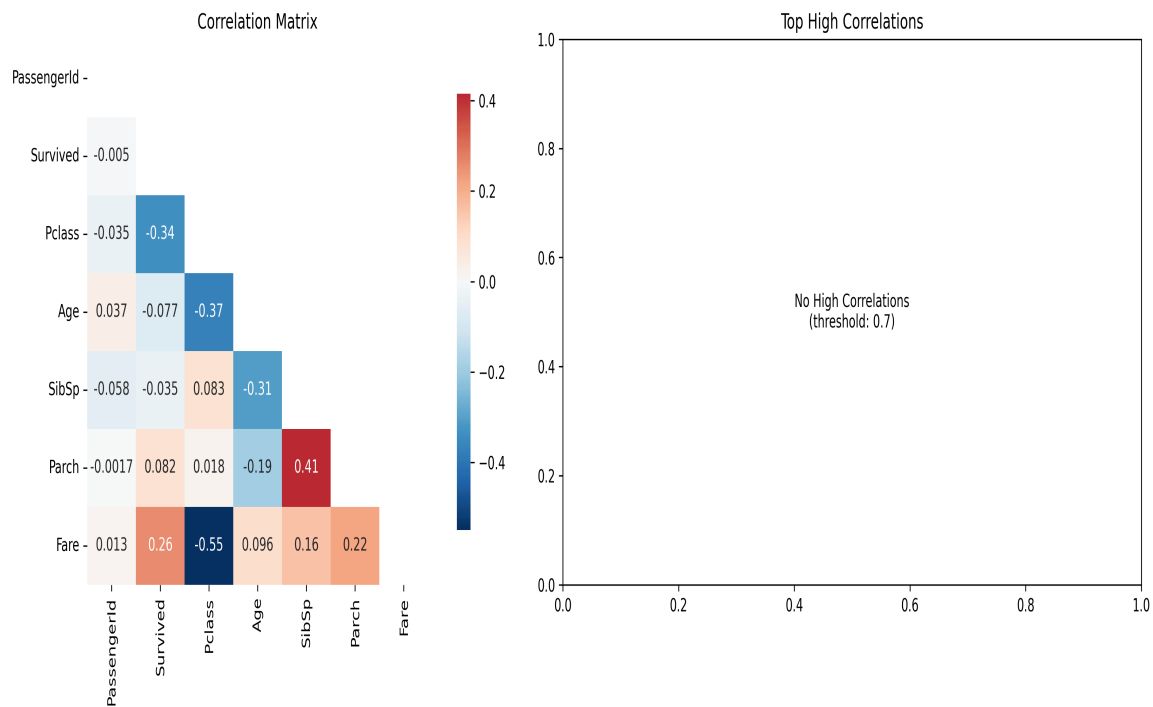

Univariate

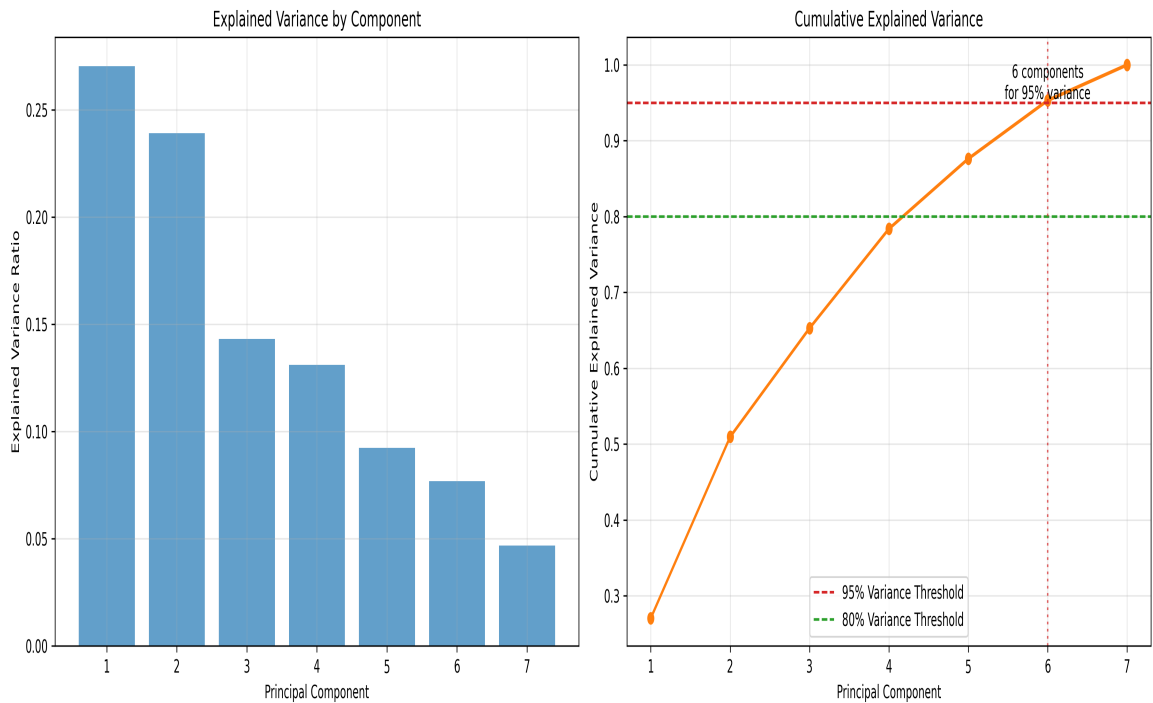

Bivariate

Multivariate

Principal Component Analysis

Target Analysis

■ AI Insights & Recommendations

■ *Data Quality Insights*

1. Dataset has 866 missing values that need attention

■ *Feature Insights*

1. Dataset has 7 numerical features for analysis
2. Dataset has 5 categorical features for encoding
